What We Do at Mt. Airy Service Center

From major engine replacements to brake and suspension repairs, we're here to keep you moving.

At Mt. Airy Service Center, no two days in the shop are exactly alike. Some vehicles come in for routine maintenance, while others require extensive repairs to get them safely and reliably back on the road.

Recently, our technicians tackled several major jobs that showcase the experience and range of services our team provides.

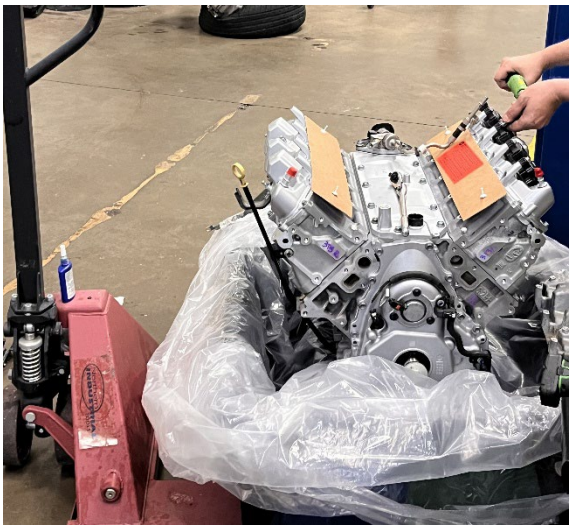

2020 Chevrolet Silverado — New 6.2L GM Crate Engine

This 2020 Chevy Silverado came to us needing a major repair—a complete engine replacement.

Our technicians removed the existing engine and installed a brand-new 6.2L GM crate engine, giving this Silverado a fresh start and getting it back where it belongs -- on the road. Engine replacement is a complex job that requires experience, attention to detail, and careful installation. It's the kind of challenge our technicians are equipped to handle.

2008 Ford F-250 Super Duty — Suspension, Body Mounts & Brakes

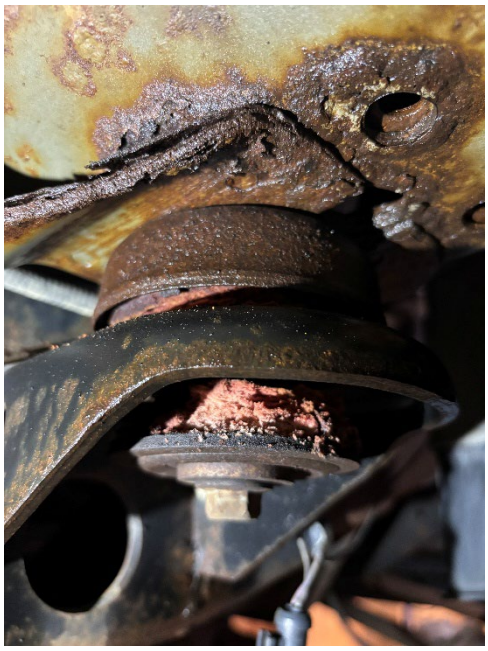

This 2008 Ford F-250 Super Duty needed attention in several areas.

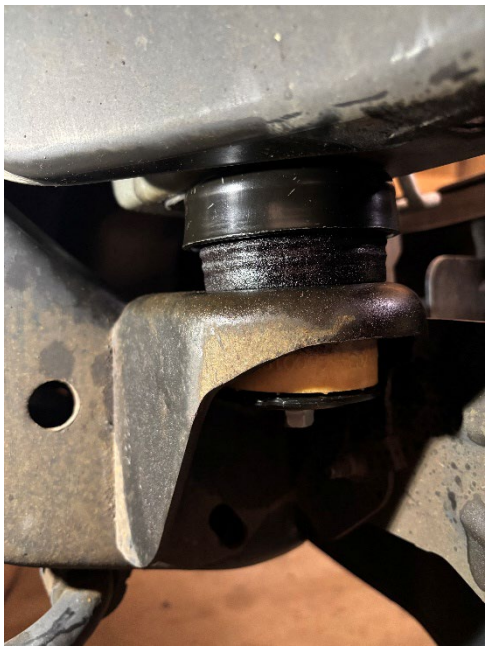

Heavy-duty trucks work hard, and over time, that can take a toll on suspension, chassis, and braking components.

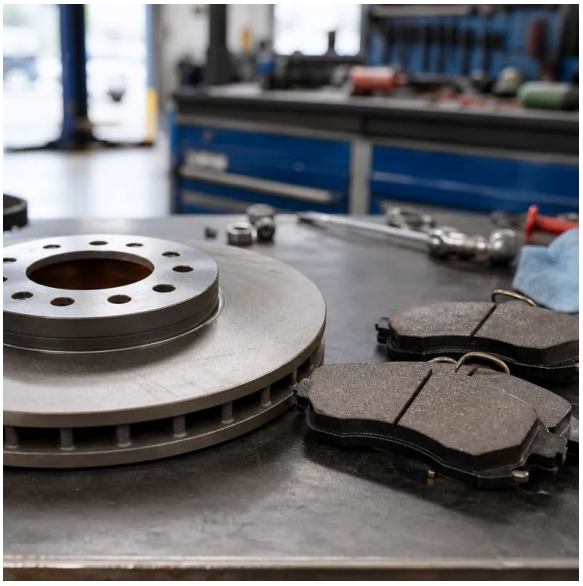

Our team replaced the spring buckets, installed new body mounts, and replaced the rear brakes. Addressing these components helped restore the truck so its owner could get back on the road with greater confidence.

2018 Jeep Wrangler — Solving an Intermittent Brake Problem

This 2018 Jeep Wrangler came to us with an intermittent brake issue.

Intermittent problems can be some of the most challenging automotive issues to diagnose. When a problem doesn't happen all the time, finding the underlying cause requires patience and a systematic approach. After diagnosing the problem, our technicians overhauled the front braking system to correct the issue and get the Jeep back on the road.

More Than Routine Maintenance

Oil changes and preventive maintenance are important, but they're only part of what we do at Mt. Airy Service Center. From complete engine replacements and complex diagnostics to suspension, steering and brake repairs, our experienced technicians have the equipment and knowledge to handle a wide variety of automotive repairs. Most importantly, we believe in doing the job right and helping our customers keep their vehicles safe, dependable, and on the road for years to come.

Does Your Vehicle Need Service?

Whether you're dealing with a warning light, unusual noise, brake problem, major mechanical issue, or it's simply time for scheduled maintenance, give Mt. Airy Service Center a call at **301-829-3970** to schedule your next appointment. We are here to help!

Mt. Airy Service Center — keeping our community moving, one vehicle at a time.
